of the Andes.**

¿WHO ARE WE?

AGROSKY S.A. is a joint-stock company specializing in the production of food for human consumption. It was founded in 2016 in the city of Latacunga, Ecuador, South America.

Our main goal focuses on the cultivation of vegetables and produce, as well as their processing, sale, and export to international markets. The products are pre-cooked using steam and frozen through IQF (Individual Quick Freezing) technology, which allows their shelf life to extend up to 24 months. Combined with excellent texture, delightful taste, and exceptional presentation, these qualities have led to widespread acceptance in demanding markets such as Germany, Japan, Canada, and the United Kingdom.

Our sales have exceeded more than 150 forty-foot containers, with a total volume close to 3,000,000 kg. Shipments are made from Latacunga (EXWORK), as well as the ports of Guayaquil and Posorja (FOB/CFR).

Our Agricultural Department manages the crops from planting, avoiding the use of certain insecticides, fungicides, and pesticides that are not suitable for human consumption. The primary goal of AgroSky S.A. is to ensure safety and maintain the excellent quality of its products.

MISSION

We produce high-quality frozen foods in harmony with the people who cultivate and process them, embracing a strong work ethic and respecting the environment. Additionally, we comply with the legal, responsible, and safety standards required by the countries to which we export.

VISION

To be an innovative, competitive company, supported by technology and offering a diversified range of products tailored to the needs of the international market.

QUALITY

Day by day, we produce high-quality frozen foods, simplifying meal preparation as our products are pre-steamed.

FOOD SAFETY

We are proud to adhere to the strictest global food safety practices, enabling us to meet and build trust with our customers who choose us for the freshness and quality of our frozen products.

ENVIRONMENT

We apply sustainable agricultural practices, respecting nature and emphasizing the careful use of inputs in cultivation.

INNOVATION

We are an agro-industrial innovation ecosystem, constantly seeking improvement in the production, packaging, transportation, and distribution of our products, meeting the challenges and demands of global markets.

CORPORATE POLICY

AGROSKY is a company dedicated to the production, distribution, and processing of agricultural products to supply human food. Therefore, our primary commitment is to ensure the quality of our products, protect the environment, and safeguard the health of our consumers. We comply with legislation and other applicable requirements related to safety, occupational health, labor codes, and the well-being of our employees.

QUALITY POLICY

Agrosky S.A. is committed to a policy of meeting customer requirements, ensuring compliance with the corresponding legislation, codes, and standards, both national and those of the country to which the product is exported. Additionally, we have procedures in place for the reception, production, storage, and transportation of products, in accordance with the food safety system, which primarily includes Good Manufacturing Practices, Quality Assurance Standards recognized by GFSI, such as BRCGS Vs. 8 hygiene, and the HACCP (Hazard Analysis Critical Control Point) system, to ensure a product suitable for human consumption. Quality is the responsibility of all employees at Agrosky S.A.

PRODUCTION PROCESS

QUALITY AND FOOD SAFETY INDUSTRY

- 1 AgroSky S.A. has a modern structure that allows us to meet the needs of each of our clients and international markets.
- 2 Sustainability of the raw material with continuous production throughout the 12 months of the year.
- 3 Its production line is characterized by the highest standards of hygiene and food safety, ensuring superior product quality and extended shelf life.
- 4 It uses the IQF (Individual Quick Freezing) method; each product piece is frozen at its peak freshness, preserving color, flavor, and nutritional value.

QUALITY & FOOD SAFETY LABORATORY

- 1 In our laboratory, container release is carried out once the corresponding certification is obtained, confirming the absence of microorganisms and pathogens that could affect human health.
- 2 Additionally, the release is conducted following validations of personnel, process lines, and other parts of the infrastructure, strictly adhering to international health standards.
- 3 We have modern equipment calibrated under the ISO 17025 standard.
- 4 Our staff has the necessary training and experience to perform microbiological analyses and other specialized services. Furthermore, we follow a continuous training plan, ensuring our team is always up-to-date and prepared to meet the highest quality standards.
